

# Open Source is the way forward for mainframe

*A look at the work and impact of the  
Open Mainframe Project*

# Why Open Source for mainframe?

# Antitrust Policy Notice

Linux Foundation meetings involve participation by industry competitors, and it is the intention of the Linux Foundation to conduct all of its activities in accordance with applicable antitrust and competition laws. It is therefore extremely important that attendees adhere to meeting agendas, and be aware of, and not participate in, any activities that are prohibited under applicable US state, federal or foreign antitrust and competition laws.

Examples of types of actions that are prohibited at Linux Foundation meetings and in connection with Linux Foundation activities are described in the Linux Foundation Antitrust Policy available at [linuxfoundation.org/antitrust-policy](https://linuxfoundation.org/antitrust-policy). If you have questions about these matters, please contact your company counsel, or if you are a member of the Linux Foundation, feel free to contact Andrew Updegrove of the firm of Gesmer Updegrove LLP, which provides legal counsel to the Linux Foundation.

# Antitrust Policy Notice

Linux Foundation meetings involve participation by industry competitors, and it is the intention of the Linux Foundation to conduct all of its activities in accordance with applicable antitrust laws. All attendees are expected to abide by these rules, which are designed to ensure that the Linux Foundation's activities do not violate antitrust laws.

**Open Mainframe Project is a pre-competitive platform that enables cooperation and leveraged development.**

**But what does that mean?**

If you have questions about these matters, please contact your company counsel, or if you are a member of the Linux Foundation, feel free to contact Andrew Updegrove of the firm of Gesmer Updegrove LLP, which provides legal counsel to the Linux Foundation.

# Cost to create Zowe

Total Physical Source Lines of Code (SLOC)

**272,536**

Development Effort Estimate

**64.81 (777.68) Person-Years (Person-Months)**

(Basic COCOMO model, Person-Months =  $2.4 * (KSLOC^{**1.05})$ )

Schedule Estimate

**1.70 (20.46) Years (Months)**

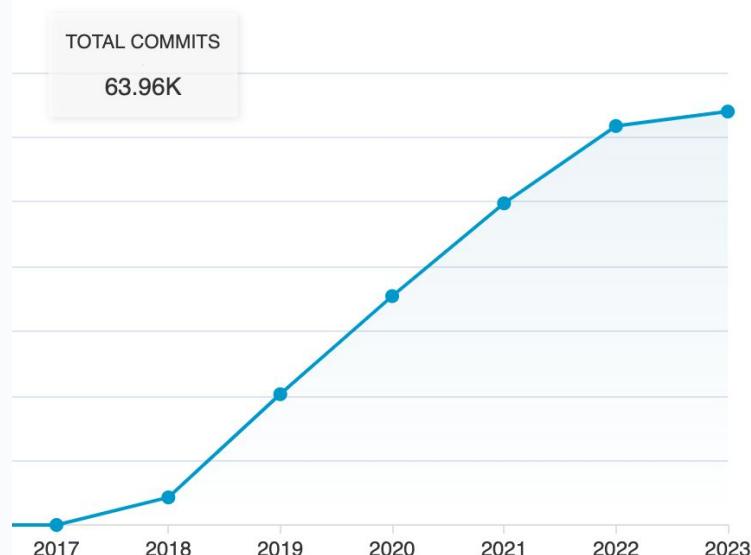

(Basic COCOMO model, Months =  $2.5 * (\text{person-months}^{**0.38})$ )

Total Estimated Cost to Develop

**\$8,754,452**

(average salary = \$56,286/year, overhead = 2.40).

generated using [David A. Wheeler's 'SLOCCount'](#)

# Top 4 contributing organizations to Zowe

Name	Logo	Contributors	Last Activity	Commits	LOC Added	LOC Deleted	Pull Request Activities	Issue Activities	Documentation Activities
Broadcom Corporation	 BROADCOM®	113	04/28/2023	19.58K	14.11M	8.22M	31.69K	12.03K	0

# Frequent Contributors Get High ROI From Open Source Foundation Membership

## Return on Investment (ROI)

Those who **frequently** contribute code upstream

Those who **sometimes** contribute code upstream

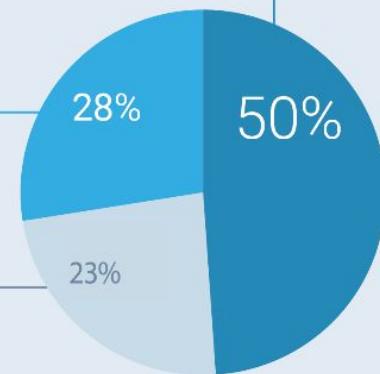

Those who **rarely or never** contribute code upstream

Extremely High Value    High Value    Average Value    Low Value    Extremely Low Value    Don't Know

## Member or sponsor of an open source foundation

Pie chart does not equal 100% because of rounding.

Source: "Open Source Programs in the Enterprise - 2020" Survey.

Is your company a member or sponsor of an open source foundation(s)? (e.g., Linux Foundation, Apache Foundation, Eclipse Foundation, OpenJS Foundation) If yes, how valuable is the support and return on your investment you have received from these open source foundations? Frequently contribute code upstream, n=95; Sometimes contribute code upstream, n=53; Rarely or never contribute code upstream, n=43.

© 2020 THE NEW STACK

# Examples of calculated value

30% of contributions (3x multiplier in value<sup>(1)</sup>)

This means Broadcom invested...

- 19.2 years of developer effort
- \$2.6M of R&D costs

and leveraged (3x multiplier<sup>(1)</sup>)...

- **175.2 years** of developer effort
- **\$23.6M** of R&D costs

## 9x R&D ROI

(1) Source:

<https://www.mckinsey.com/industries/technology-media-and-telecommunications/our-insights/developer-velocity-how-software-excellence-fuels-business-performance>

# But there are more benefits than just pure R&D

- Leadership
  - ◆ Top contributing organizations in best position to drive ecosystem direction.
  - ◆ End-users more likely to work with vendors who are primary contributors and invest in upstream projects.
- Supply chain efficiencies
  - ◆ License and security vulnerability management done in upstream project
  - ◆ Partner and developer onboarding can leverage broad community versus specific vendor resources.
- Vendor-neutral outreach and training
  - ◆ Technology enablement done at project level
  - ◆ Vendor can focus on specific value adds.

**Typical ROI 5x-40x**

dependent on membership, staff, and product investment

Challenge:

How can we grow and sustain  
open source on mainframe?

# Enter Open Mainframe Project

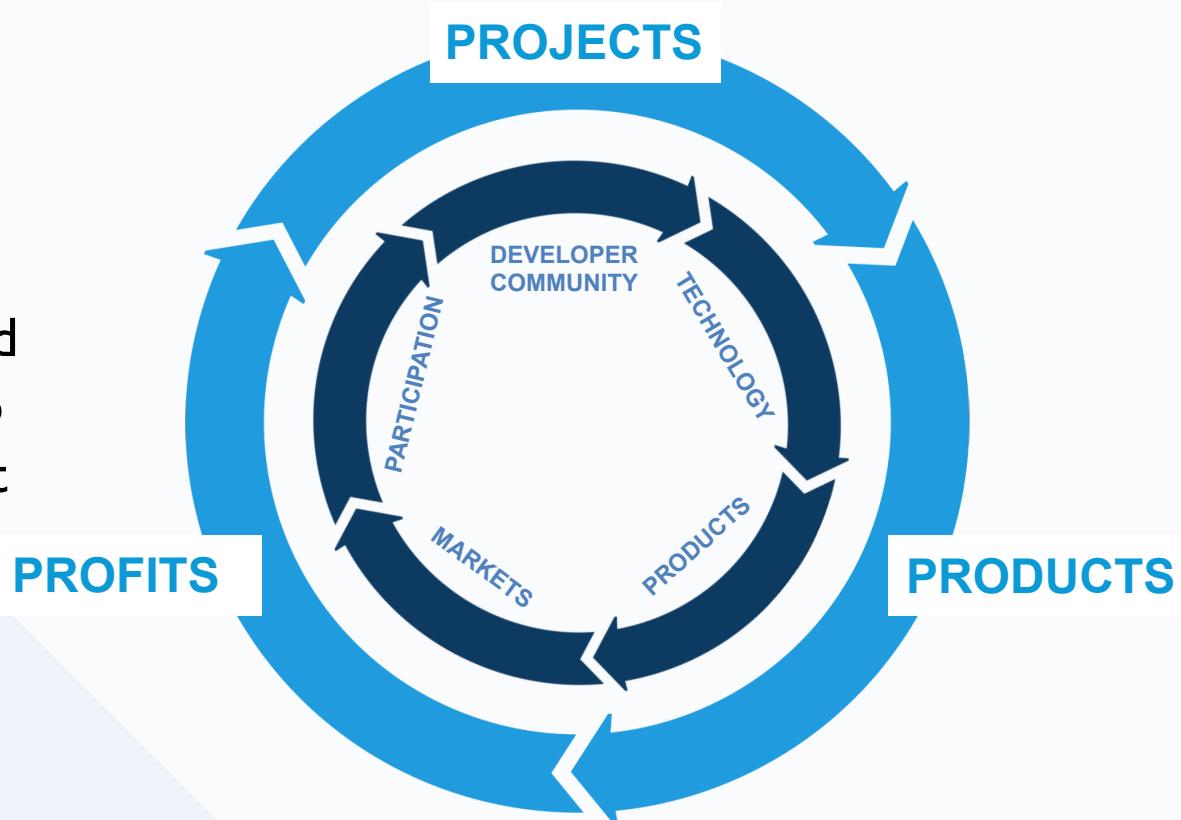

Open Mainframe Project believes...

- that leading organizations leverage their **technology infrastructure as a competitive advantage**.
- that the mainframe design principles of **security, stability, scalability, and performance are important** to these leading organizations
- **having the mainframe interoperable** in a hybrid infrastructure enables leading organizations to realize its benefits.
- technical advancements that are needed by the mainframe community can be **better achieved through open source**.

# Open Mainframe Project enables sustainable open source

Successful projects depend on members, developers, standards and infrastructure to develop products that the market will adopt.

## Vision

The mainframe is an active, integrated, and essential part of modern enterprise IT, consumable by mainstream developers and users, and driven by a vibrant open source community.

## Mission

To achieve the vision of the Open Mainframe Project by...

**Setting a high bar for application development on the mainframe** through documentation, API development, and a security-first approach.

**Showcase the mainframe of today** to both the mainframe ecosystem as well as the broad enterprise IT community.

**Enable the mainframe to be more consumable by developers** with a transparent experience in leveraging the value propositions of the mainframe.

**Ensure the mainframe aligns well in the changing enterprise IT landscape** of cloud-native and DevOps.

# Open Mainframe Project:

*part of The Linux Foundation ecosystem of sustainable open source*

For the last 16 years, The Linux Foundation has provided unparalleled support for open source communities through financial and intellectual resources, governance structure, IT infrastructure, services, events, and training.

Dedicated to building sustainable ecosystems around open source projects, The Linux Foundation is working with the global technology community to solve the world's hardest problems through open source and **creating the largest shared technology investment in history.**

The Linux Foundation is the umbrella organization for **more than 1000 open source projects** accelerating open technology development and commercial adoption. Some of the game-changing initiatives hosted by The Linux Foundation include:

CLOUD NATIVE  
COMPUTING FOUNDATION

HYPERLEDGER  
BLOCKCHAIN TECHNOLOGIES FOR BUSINESS

Zephyr™  
Project

kubernetes

OpenSSF  
OPEN SOURCE SECURITY FOUNDATION

Fintech

*This landscape is intended as a map to explore open source projects within the mainframe industry, and also shows the member companies of the Open Mainframe Project.*

Source: <https://landscape.openmainframeproject.org/fullscreen>

# Broad open source supported on mainframe

Source: <https://landscape.openmainframeproject.org/fullscreen/open-source>

# Open Mainframe Project enables innovation

# Enabling innovation - connecting z/OS to enterprise devops with Zowe

## Major Problem

Modernize integration with z/OS based applications and services  
Bridge the talent gap by enabling modern development stacks on z/OS

## How We Innovated

2018 Open Mainframe Project added Zowe from contributions from Broadcom, IBM, Rocket Software  
2019 Zowe reached 1.0, launched Zowe Conformant to enable downstream ecosystem; investments in collaboration, ecosystem development, and infrastructure  
2021 Zowe formed TSC to have technologists lead project direction; launched Zowe Support Conformant Program  
2022 Zowe 2.0 release  
2023 Zowe grows focuses on security and training

## Results

60,000+ Commits, 1000+ contributors all time  
38% of mainframe customers using Zowe in production; 31% planning to in the next year (source Arcati Mainframe Yearbook 2023)  
50+ Zowe Conformant offerings, 3 Zowe Conformant Support Providers  
7000+ completed Zowe training offered by Interskill  
New project contributions from BMC, IBA Group, Vicom Infinity, and others, has grown codebase

# Enabling innovation - modernizing COBOL

OPEN MAINFRAME PROJECT  
**COBOL**  
Programming Course

OPEN MAINFRAME PROJECT

**COBOL Check**

OPEN MAINFRAME PROJECT  
**COBOL**  
Working Group

## Major Problem

COBOL talent is critical to our society, and the need has amplified in the COVID-19 pandemic.

Enabling the next generation to have COBOL skills done in isolation, causing repeated efforts and lower uptick.

COBOL lacking tools that align with modern development

## How We Innovated

Launched [COBOL Programming Course](#) as an open source project in April 2020, teaching COBOL development using VS Code and Zowe.

Created [collaboration forums](#) and ways that COBOL talent can advertise their availability

Launched [COBOL Working Group](#) to bring together leaders in thinking about the future of COBOL

[COBOL Check](#) project launched, bringing TDD practices to COBOL

## Results

“[Calling all COBOL Programmers](#)” forum has had over 1.9k individuals make themselves available since April 2020

[COBOL Programming Course GitHub repo](#) has 2.5k stars and 500+ forks, along with 22 contributors from several organizations, continuing to evolve with deeper level COBOL training content

COBOL Working Group getting broad feedback on the future direction of COBOL  
COBOL Check a step forward in modern dev practices and being integrated into VS Code and COBOL Programming Course curriculum.

# Enabling innovation - create hub for Linux on Z and z/VM community

## Major Problem

Users want to manage their mainframes with the same modern cloud technologies used across the enterprise.

z/VM integration with technologies such as OpenStack have long been a challenge.

Contribution base was IBM only, making it challenging to get wider adoption

z/VM lacked a sustainable hub for community tools and utilities

Linux distributions supporting s390x mainframe

## How We Innovated

2019 Open Mainframe Project added Feilong

2020 Software Discovery Tool and Tessia added as a projects

2021 z/VM Community Tools forms as a Sandbox project, Linux Distributions Working Group formed

## Results

Central repository for open source on mainframe developed, tracking across all major distributions (  
<http://sdt.openmainframeproject.org>)

Sustainable and coordinated maintainership for s390x Linux distributions, including Alma Linux, Debian, Fedora, and openSUSE amongst others.

Central hub being developed for z/VM tools and utilities for easier discoverability.

# Enabling innovation - with the next generation

OPEN MAINFRAME PROJECT

## MENTORSHIP

### Major Problem

Aging tenured mainframe talent, with a growing mainframe talent gap and skills decline in next generation talent.

Needing to help connect students with opportunities in mainframe, aligning the interests in open source

### How We Innovated

Launched first mentorship program in 2016 with 7 mentees.

Connected within the mainframe and broad open source community to ensure mentorship work has upstream project value.

Enabled universities to also leverage the program within class work; successful with VCU and Western University (Ontario)

### Results

70+ mentees completed the program, with broader classwork focus reaching 100s more.

Upstream work has included ports of Alpine Linux, contributions to HyperLedger, OpenStack, CloudFoundry, Kubernetes, and more.

Several mentees are now employed in mainframe roles with IBM, SUSE, ADP, and more.

Innovation enablement is more than code

# Enabling innovation by telling the “mainframer” story

- Monthly interview series that highlights diversity in mainframe
- Showcases why people have mainframe in their careers and their views of the technology and career field
- Read and listen at [openmainframeproject.org/podcast](http://openmainframeproject.org/podcast)

# Enabling innovation by providing an “open” mainframe

Hosted by Marist College, and through the donation of hardware by Broadcom Mainframe Software, the Open Mainframe Project has a mainframe resource available to **any** open source project looking to support Linux on s390x, z/OS, or z/VM.

More details to come in 2023

# Enabling community by creating new ecosystems

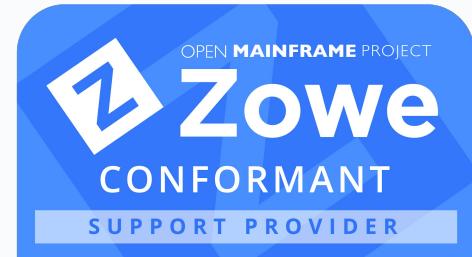

Zowe Conformance Program enables vendors to showcase their offerings based on Zowe, as well as their capabilities in supporting Zowe end-users.

Zowe Support Provider Conformance Program gives vendors the ability to showcase their Zowe support competencies.

## Benefits

- Your offering and logo listed in the [Zowe Conformant offering directory](#) or [Zowe Conformant Support Provider directory](#) and showcased in Zowe outreach materials
- Exclusive branding marks to use in your product materials
- Participation in the Zowe Advisory Council (ZAC)
- PR announcement for new organizations providing offerings
- Post a guest blog post on your offering on the Open Mainframe Project and Zowe blog

## Fees are waived for Open Mainframe Project members

More details at

<https://www.openmainframeproject.org/projects/zowe/conformance>

# Enabling community through a focal event for open source on mainframe

Open Mainframe Summit is the annual event that brings together the open source and mainframe ecosystems, discussing projects, trends, and executive insights.

2023 Dates to be announced

# Getting involved in Open Mainframe Project

# Contribute to our projects - anyone can!

## Contribute to an existing project:

- Submit a PR with a bugfix or new feature
- Pick existing GitHub issue as a sample project
- Integrate with a new app / contribute plugin
- Help improve project documentation
- Submit additional test cases
- Join the TSC discussion: dev mailing list, conf calls

## Get involved with the TAC or Working Group:

- DevOps / CI expertise always useful
- Interest / expertise in security especially welcome
- Join the TAC discussions: mailing list, conf calls, working groups

## More information at

[tac.openmainframeproject.org/engagement](https://tac.openmainframeproject.org/engagement)

## Getting Involved in Projects

All of the projects hosted at the Open Mainframe Project are open and transparent, and welcome participation from anyone interested in the technology areas. Each project publishes their governance processes within their project repo (typically in the README.md file or in a GOVERNANCE.md file within the primary project repo or TSC repo) on roles within the community and how decision making is made.

### TAC Meetings

Learn more about joining the public meetings of the Technical Advisory Council (TAC) on the [Meetings page](#)

### Mailing Lists and Slack channels for hosted projects

Each project hosted at the Open Mainframe Project collaborates on open channels that are welcome for anyone in the community to participate in. See the below list of channels for each project.

All Slack channels referenced below are part of the [Open Mainframe Project Slack organization](#)

# Why become a member?

# Becoming an Open Mainframe Project member means your organization is...

- a leader in the open source on mainframe community
- wants to drive the technical vision of open source on mainframe
- a thought leader or aims to be a thought leader in open source on mainframe
- bringing solutions to market based on projects hosted at the Open Mainframe Project, and wanting to show your stewardship towards those communities

# Leverage our industry presence to advance your thought leadership.

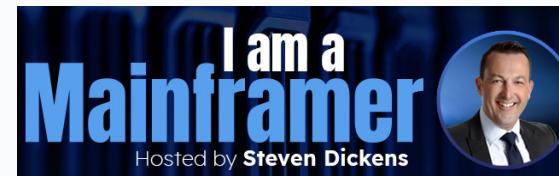

Through our large audience, extensive media outreach, and with key partnership with publications such as [Linux.com](#), [TFiR](#), [TechChannel](#), and [MediaOps](#), you will be positioned to be a thought leader in open source. Specific benefits include...

- Announcement of your membership via press release and social.
- Your company logo on both the [Open Mainframe Project website](#) and [Linux Foundation website](#).
- Guest blog post(s) on the [Open Mainframe Project blog](#) on a thought-leadership topics of our choice.
- Provide a guest for the "[I Am A Mainframer](#)" podcast, hosted by Steven Dickens and Open Mainframe Project
- Post one technical article about an open source project you care about to [Linux.com](#), which has over 1 million unique visitors per month.
- Support of your announcements with social outreach and quotes from Linux Foundation and/or Open Mainframe Project leadership as appropriate.
- Access to opportunities for contributed articles, videos, podcasts, and events

# Member exclusive opportunities for Open Mainframe Summit

Members have an exclusive opportunity to participate in our annual Open Mainframe Summit, this year in person in Philadelphia. This event is the focal point for the open source and mainframe community, bringing together developers, users, and executives, from the mainframe community and beyond.

Member benefits include...

- Discounts on registration and sponsorship
- Include your news relating to open source on mainframe with our press materials to reach the 20+ reporters and analysts covering the event.
- Onsite meetings with Open Mainframe Project leadership

# Additional Event Participation Opportunities

- One invite to our member-exclusive [Linux Foundation Member Summit](#), which fosters collaboration, innovation, and partnerships among the leading projects and organizations working to drive digital transformation with open source technologies.
- Employees at your organization receive a 20% registration discount to eligible [Linux Foundation events](#), such as our Open Source Summit events in North America, Europe, and Japan.
  - Open Mainframe Project hosts mini-events for members and the community at these events.
- A 5% Discount on [Linux Foundation Event Sponsorship](#), including [Open Mainframe Summit](#) (7% discount on multi-event Sponsorships). Sponsorships offer a valuable way to reach the community of Open Source Developers, Engineers, C-level Executives, and more.

# Join the Zowe Conformance Program

Zowe Conformance Program enables vendors to showcase their offerings based on Zowe, as well as their capabilities in supporting Zowe end-users.

Zowe Support Provider Conformance Program gives vendors the ability to showcase their Zowe support competencies.

## Benefits

- Your offering and logo listed in the [Zowe Conformant offering directory](#) or [Zowe Conformant Support Provider directory](#) and showcased in Zowe outreach materials
- Exclusive branding marks to use in your product materials
- Participation in the Zowe Advisory Council (ZAC)
- PR announcement for new organizations providing offerings
- Post a guest blog post on your offering on the Open Mainframe Project and Zowe blog

## Fees are waived for Open Mainframe Project members

More details at <https://www.openmainframeproject.org/projects/zowe/conformance>

# Showcase your career opportunities in mainframe

- Showcase of Open Mainframe Project members who are hiring for mainframe positions
- Not a job board - links to each member's job listings

The screenshot shows the homepage of the Open Mainframe Project's careers section. At the top, there is a navigation bar with links for ABOUT, PROJECTS, COMMUNITY, NEWS, RESOURCES, and CONTACT, along with social media icons for Twitter, LinkedIn, YouTube, GitHub, and others. A search bar is also present. The main header reads "CAREERS IN MAINFRAME" over a background image of a globe with glowing city lights. Below the header, a text block says: "Are you looking to see where mainframe and open source skills can take you? Check out the many open opportunities from Open Mainframe Project members below for the next step in your career." Below this text, there are four rows of company logos, each with a "LEARN MORE" button underneath:

Row 1	ADP	BROADCOM	epam	IBM
Row 2	LEARN MORE	LEARN MORE	LEARN MORE	LEARN MORE
Row 3	MICRO FOCUS	Rocket software	SUSE	precisely
Row 4	LEARN MORE	LEARN MORE	LEARN MORE	LEARN MORE

At the bottom of the page, there is a small note about trademarks and a link to the Terms of Use. Social media icons are located at the very bottom right.

**ACTION: Provide a link to your job listings specific to mainframe positions**

<https://www.openmainframeproject.org/resources/careers>

# Host a mentorship

Open Mainframe Project funds mentorships for students to bring new talent into mainframe through contributions to open source. These mentees have made huge impacts on hosted projects such as Zowe, Feilong, COBOL Programming Course, and more, as well as broad open source projects such as Alpine Linux, CloudFoundry, Kubernetes, and more.

Members can provide a mentorship and be a mentor, which is funded by the Open Mainframe Project. This provides a unique opportunity to find new talent.

Contact [mentorship@openmainframeproject.org](mailto:mentorship@openmainframeproject.org) if you are interested.

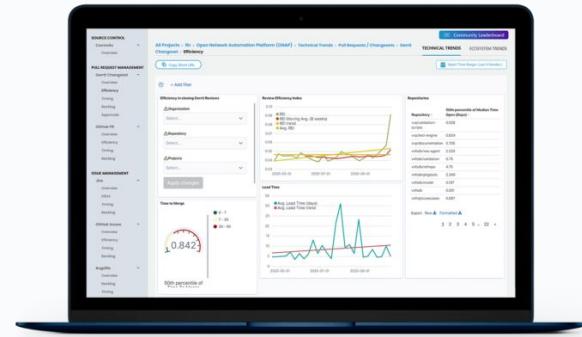

# Measure your project impact with LFX Insights

**LFX Insights (Technical Trends)** is a new analytics tool that is provided to all open source projects hosted by the Linux Foundation. Its capabilities include:

- Getting the visibility you need to remove bottlenecks at any stage of your project's code pipeline. Drill down into performance metrics across every step in the development lifecycle to identify where you should be focusing your resources.
  - Ensuring the health and viability of the open source projects you care about. Leverage data to help validate projects for investment, and track the activity and growth of projects your organization is already involved in.
  - Showcasing your organization's leadership and subject matter expertise in the open source community. Leverage affiliations to measure the impact of your employees' contributions and capture the full picture of your team's impact

In addition to the use of the other LFX tools provided by the Linux Foundation, access to **LFX Insights (Ecosystem Trends)** tool is available to Open Mainframe Project Silver and Platinum members, which provides additional visibility into tracking your project's performance beyond code with a more holistic view of your ecosystem. Identify opportunities to grow your community and increase awareness with ecosystem trend metrics including share of voice, top influencers, email list collaborators, and more.

**LFX** Insights

# Maximize Your Open Source Investment with training

THE  
**LINUX**  
FOUNDATION

## Training & Certification

The Linux Foundation offers training and certification direct from the source, those contributing to the world's most important open source projects.

**As an Open Mainframe Project Silver or Platinum member, you are entitled to 10 vouchers for 100% any...**

- LF eLearning Class
- Certification Exam
- eLearning+Certification Exam “Bundle”.

The value is \$299+ per course.

# Improve your open source compliance and practices

As a Linux Foundation member, your in-house counsel has access to the leading vendor-neutral resources in open source compliance, best practices, and training, along with peer collaboration. Specific benefits include...

- Your legal counsel's ability to participate in bi-monthly legal calls
- One invite for your in-house counsel to [LF Legal Summit](#), which helps connect your counsel to their peers at other member companies and advance your organization's open source licensing, litigation, compliance, and best practices.
- Access to a complimentary membership to the [TODO Group](#), which is a forum for discussing best practices and approaches for establishing and managing open source program offices in organizations.
- Support from the vast expertise in the Linux Foundation in engaging with open source, and even starting your own open source project(s).

THE LINUX FOUNDATION

## Welcome to The Linux Foundation!

The Linux Foundation works with companies and communities to support the development of critical, sustainable open source projects. Companies and organizations join the LF in order to enable better collaboration among businesses and technical leaders in the open source community.

The LF also serves a key role as a neutral, collaborative forum for in-house counsel to come together and discuss legal matters relating to their development and use of open source. This welcome packet is intended to introduce your legal teams to some of the LF groups and resources that are available to them.

### LF Member Counsel

The Linux Foundation hosts recurring events for the in-house legal teams from LF members, including:

- [bimonthly member counsel calls](#), where the LF legal team discusses current topics facing our members and projects in their interactions with open source projects and communities;
- our annual [Legal Summit](#), where our members' legal teams gather for deep dives, presentations and workshops, and honest and frank debates on critical open source legal matters.

One point of clarification is that these events are for lawyers. It is acceptable to include someone else from your organization, but you must have a lawyer present as it will make other lawyers uncomfortable to participate with unrepresented individuals from other companies.

LF Member Counsel events are open to all of our members' legal teams, and are coordinated via mailing list. Please contact us at [legal@linuxfoundation.org](mailto:legal@linuxfoundation.org) to be added to the list.

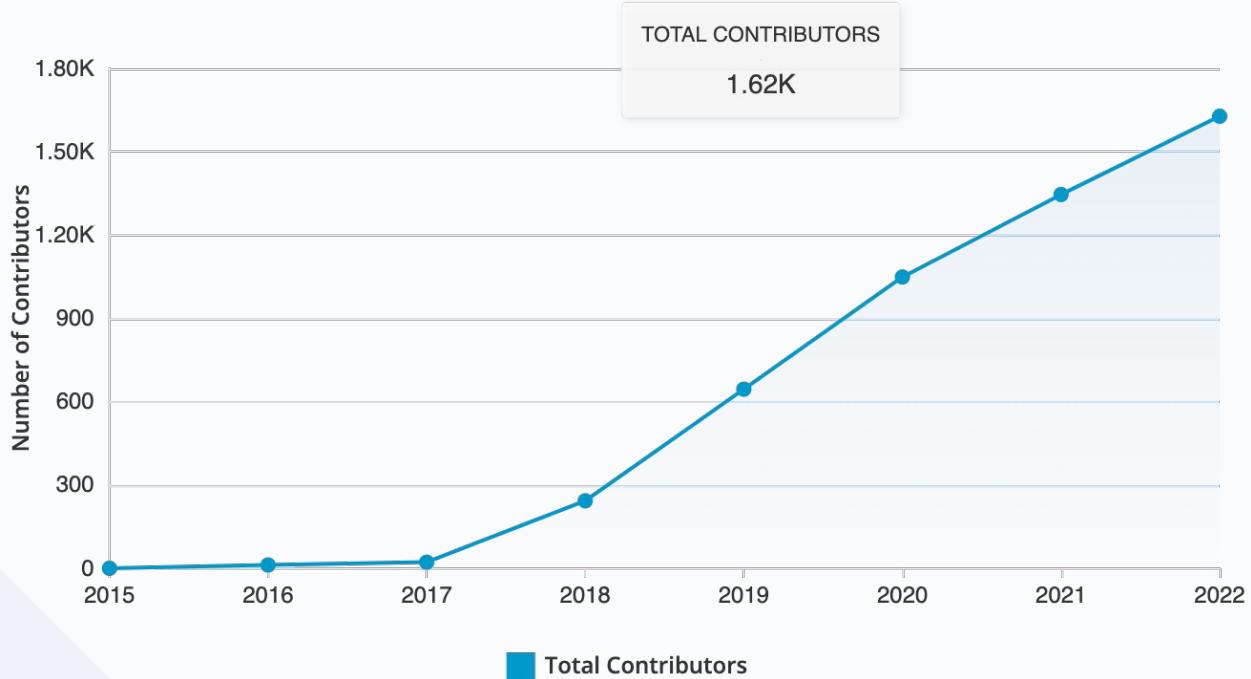

### Projects: Compliance, Licensing and Best Practices

ACT	<a href="https://automatecompliance.org/">https://automatecompliance.org/</a> ACT (Automating Compliance Tooling) seeks to improve software tooling for detecting and complying with open source licenses. Its goal is to improve the efficiency of open source compliance tools to enable compliance workflows that can be optimized for each company's unique build and release process.
OPENCHAIN	<a href="https://www.openchainproject.org/">https://www.openchainproject.org/</a> OpenChain defines the key requirements for an organization's open source compliance program. It establishes a conformance program where companies can self-certify to these requirements, with the goal of improving transparency and communication of compliance information across supply chains.
SPDX	<a href="https://spdx.dev/">https://spdx.dev/</a> SPDX (Software Package Data Exchange) is a specification for communicating Software Package Data in a standardized, human- and machine-readable format. It enables better communication of information, including license and copyright details, between organizations and interoperability between compliance tools.
TODO	<a href="https://todogroup.org/">https://todogroup.org/</a> The TODO Group (Talk Openly, Develop Openly) is a forum where participants discuss best practices and approaches for open source strategy in their businesses. Participants include members of open source program offices and related teams, collaboratively addressing various strategic considerations interacting with open source communities.
COMMUNITY DATA LICENSE AGREEMENT	<a href="https://cdla.io/">https://cdla.io/</a> CDLA (Community Data License Agreement) is a pair of licenses that were jointly drafted by members of the LF Member Counsel community. They define reusable license terms intended to better address unique issues that arise in open data collaboration.

# But most importantly, you support innovation

Our collaborative projects and working groups are successful because of the investment of members funding these initiatives.

# Drive the direction of the foundation through Platinum Membership

Platinum members are the key stewards of the Open Mainframe Project, and as such hold key leadership positions in the various governance structures. Their investment is key to the sustainability of open source in mainframe.

Specific Benefits include:

- Voting seat on the Governing Board, TAC, and Marketing Committee, enabling the member to direct the strategic direction, budget, and priorities of the Open Mainframe Project.
- Host an Open Mainframe Project webinar and have a guest on the “I Am A Mainframer” podcast annually, if desired.
- Regular meetings to brief on project activities, and an annual membership check-in to review engagement opportunities and provide feedback to project leadership.
- First opportunity to participate and drive event and outreach opportunities, and the project will ensure partnership with Platinum Members in relevant events.
- Open Mainframe Project leadership will support Platinum Member events, internal open source program efforts, and be available for customer and prospect engagement.
- Additional training benefits through [LF Training](#).

# Corporate, Academic, Associate Membership Levels

Level	Annual Fee Includes LF Silver Membership	Board Seat	TAC Seat	Marketing Committee	Notes
Platinum	\$120,000	Yes	Voting	Yes	Initial 2-year participant commitment
