Antitrust Compliance Notice

Open Mainframe Project meetings involve participation by industry competitors, and it is the intention of the Open Mainframe Project to conduct all of its activities in accordance with applicable antitrust and competition laws. It is therefore extremely important that attendees adhere to meeting agendas, and be aware of, and not participate in, any activities that are prohibited under applicable US state, federal or foreign antitrust and competition laws.

Examples of types of actions that are prohibited at Open Mainframe Project meetings and in connection with Open Mainframe Project activities are described in the Linux Foundation Antitrust Policy. If you have questions about these matters, please contact your company counsel, or if you are a member of the Open Mainframe Project, feel free to contact Andrew Updegrove of the firm of Gesmer Updegrove LLP, which provides legal counsel to the Open Mainframe Project.

OPEN MAINFRAME PROJECT

The Open Mainframe Project was founded in 2015, as a focal point for deployment and use of Linux and Open Source in a mainframe computing environment.

Open Source is the collective thread within leading organizations that look to leverage their technology infrastructure as a competitive advantage. The mainframe design principles of security, stability, scalability, and performance are important to these leading organizations, and having the mainframe interoperable in a hybrid infrastructure enables leading organizations to realize its benefits. Open Mainframe Project believes this is best achieved as a community through open source.

Open Mainframe Project hosts 17 projects and working groups and is supported by 40 organizations.

Vision

The mainframe is an active, integrated, and essential part of modern enterprise IT, consumable by mainstream developers and users, and driven by a vibrant open source community.

Mission

To achieve the vision of the Open Mainframe Project by…

Setting a high bar for application development on the mainframe through documentation, API development, and a security-first approach.

Showcase the mainframe of today to both the mainframe ecosystem as well as the broad enterprise IT community.

Enable the mainframe to be more consumable by developers with a transparent experience in leveraging the value propositions of the mainframe.

Ensure the mainframe aligns well in the changing enterprise IT landscape of cloud-native and DevOps.

Open Mainframe Project:

part of The Linux Foundation ecosystem of sustainable open source

THE LINUX FOUNDATION

For the last 16 years, The Linux Foundation has provided unparalleled support for open source communities through financial and intellectual resources, governance structure, IT infrastructure, services, events, and training.

Dedicated to building sustainable ecosystems around open source projects, The Linux Foundation is working with the global technology community to solve the world's hardest problems through open source and **creating the largest shared technology investment in history**.

The Linux Foundation is the umbrella organization for **more than 1000 open source projects** accelerating open technology development and commercial adoption. Some of the game-changing initiatives hosted by The Linux Foundation include:

CLOUD NATIVE COMPUTING FOUNDATION

HYPERLEDGER BLOCKCHAIN TECHNOLOGIES FOR BUSINESS

Zephyr™ Project

kubernetes

OpenSSF OPEN SOURCE SECURITY FOUNDATION

CD.FOUNDATION

FINOS Fintech Open Source Foundation

ASWF /* ACADEMY SOFTWARE FOUNDATION

Let's Encrypt

RISC-V

Open Mainframe Project Governance at a glance

The Linux Foundation Internal Use Only

Governing Board

Comprised of one voting representative from each Platinum Open Mainframe Project member, 1 annually elected Silver member representative per 10 Silver members, 1 annually elected Academic member representative per 10 Academic members, the TAC Chairperson, and attended by the Marketing Committee Chair, the Governing Board's responsibilities include:

- Approving a budget
- Electing a Chair to preside over Governing Board meetings, authorize expenditures approved by the budget and manage any day-to-day operations
- Overseeing all Project business and marketing matters

Current Governing Board members listed at
https://www.openmainframeproject.org/about/governing-board

Governing Board Representatives

Len Santalucia

Chair

Converge Technology Solutions Corp

Geoffrey Decker

Academic Member Representative

Northern Illinois University

Idival Amaro

Broadcom Corporation

Meredith Stowell

International Business Machines Corporation

Mike Friesenegger

TAC Representative

SUSE Software Solutions Germany GmbH

Phil Tully

Open Mainframe Project - OKRs 2026

O1 - Grow partnerships with key industry events and groups.

- KR1 - Continue having a track as GS UK and Community Day at IBM TechXchange, increasing session submissions and attendees to talks by 10%.
- KR2 - Partner with SHARE on a track that features Open Mainframe Project initiatives and open source on the mainframe.
- KR3 - Sponsor VM Workshop and increase sessions featuring Open Mainframe Project initiatives, and open source on the mainframe by 10%.
- KR4 - Continue work with MSCS, growing the amount of content related to diversity in the mainframe industry by 10%

O2 - Strengthen technical initiatives and support for broad open source projects on the mainframe

- KR1 - Leverage new mainframe infrastructure to offer open source communities CI/CD/testing infrastructure for their projects
- KR2 - Create a tighter alignment between Ambitus, Software Discovery Tool, Linux Distributions WG, zopen community, and Mainframe Software Hub for Linux to enable cooperation in making open source tools supported and available across z/OS and Linux s390x.
- KR3 - Increase contributions, organizations, and contributors across all projects by 10%

O3 - Strengthen organizational engagement

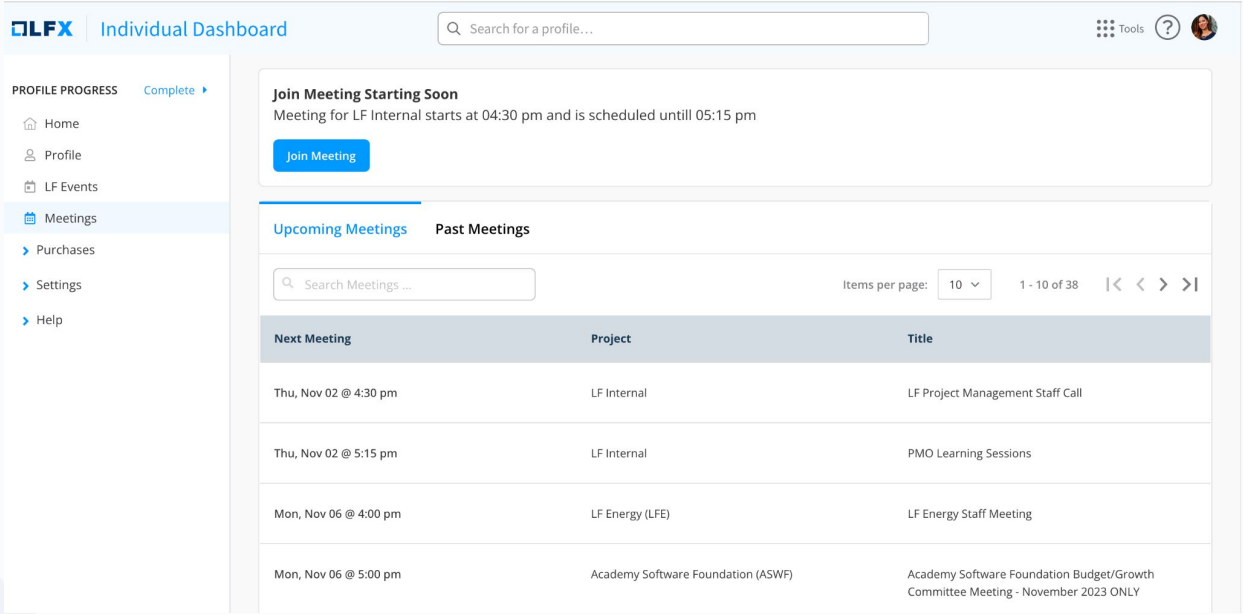

- KR1 - Add 1 new Platinum member and 5 Silver members
- KR2 - Publish 10 customer/vendor references speaking to how they leverage Open Mainframe Project technical work
- KR3 - Develop an end-user advisory group with five customers.

2026 Governing Board meeting schedule

All meetings from 2:00pm - 3:30pm US Eastern time unless noted.

- ➔ February 11, 2026
- ➔ May 13, 2026
- ➔ August 12, 2026
- ➔ November 11, 2026

Meeting will be on your calendar, and available at openprofile.dev/my-calendar

Appointing your Governing Board representative

(Platinum Members only)

As a Platinum Member, you are entitled to appoint a representative from your organization to serve on the Governing Board. Expectations of this include..

- Attending quarterly Governing Board meetings (generally 2nd Wednesday of the 2nd month of the quarter at 2:00pm US Eastern Time)
- Participation in membership recruitment activities.
- Availability for time-to-time for strategic discussions and calls.

ACTION: To appoint your representative and your alternate, please file a request at servicedesk.openmainframeproject.org, and have the representatives create an LF ID.

You can change your representative at any time by making a request at servicedesk.openmainframeproject.org.

Silver Member Governing Board representative

(Silver Members only)

Per the Open Mainframe Project charter, Section 3(a)(iii), the Silver Member class is entitled to elect…

> *one Silver Member representative (rounded down to the nearest whole number, but at least one at any time there is at least one Silver Member of the Project) elected annually by the Silver Members for every 10 Silver Members; with no more than three Silver Member representatives;*

The Silver Member class elects new representative(s) during the month of December to serve a term from January 1st through December 31st of that calendar year.

ACTION: Look for details regarding the election in November.

If you have any questions about this process or the role, please contact us at servicedesk.openmainframeproject.org or refer to the elections policy at https://github.com/openmainframeproject/foundation/blob/main/elections.md

Academic Institution Member Governing Board representative

(Academic Institution Members only)

Per the Open Mainframe Project charter, Section 3(a)(iv), the Academic Institution Member class is entitled to elect…

> *one Academic Institution Member representative (rounded down to the nearest whole number, but at least one at any time there is at least one Academic Institution Member of the Project) elected annually by the Academic Institution Members for every 10 Academic Institution Members; with no more than three Academic Institution Member representatives;*

The Academic Institution Member class elects new representative(s) during the month of December to serve a term from January 1st through December 31st of that calendar year.

ACTION: Look for details regarding the election in November.

If you have any questions about this process or the role, please contact us at servicedesk.openmainframeproject.org or refer to the elections policy at https://github.com/openmainframeproject/foundation/blob/main/elections.md

Technical Advisory Council (TAC)

The TAC is the technical governance heart and soul of the project. As new projects get contributed to the project they get reviewed and approved by this committee.

TAC voting members consist of Platinum Open Mainframe Project members as well as the project leads for all active stage projects. Anyone in the community can attend TAC meetings.

All are invited to attend these calls and encouraged to join the technical mailing list for more information:

https://tac.openmainframeproject.org/meetings/

Add Monthly TAC Meeting to your Calendar Now.

Technical Advisory Council (TAC) Representatives

Sean Grady

Senior Software Architect

Rocket Software, Inc.

Appointing your TAC representative

(Platinum Members only)

As a Platinum Member, you are entitled to appoint a representative from your organization to serve on the TAC. Expectations of this include..

- Attending twice monthly meetings (generally 2nd and 4th Thursdays of the month at 1:00pm US Eastern Time).
- Serve as an advisor to one or more hosted projects or working groups.
- Availability for time-to-time for strategic discussions and calls.

ACTION: To appoint your representative, please file a request at servicedesk.openmainframeproject.org, and have the representatives create an LF ID.

You can change your representative at any time by making a request at servicedesk.openmainframeproject.org.

Contribute to Our Projects - anyone can!

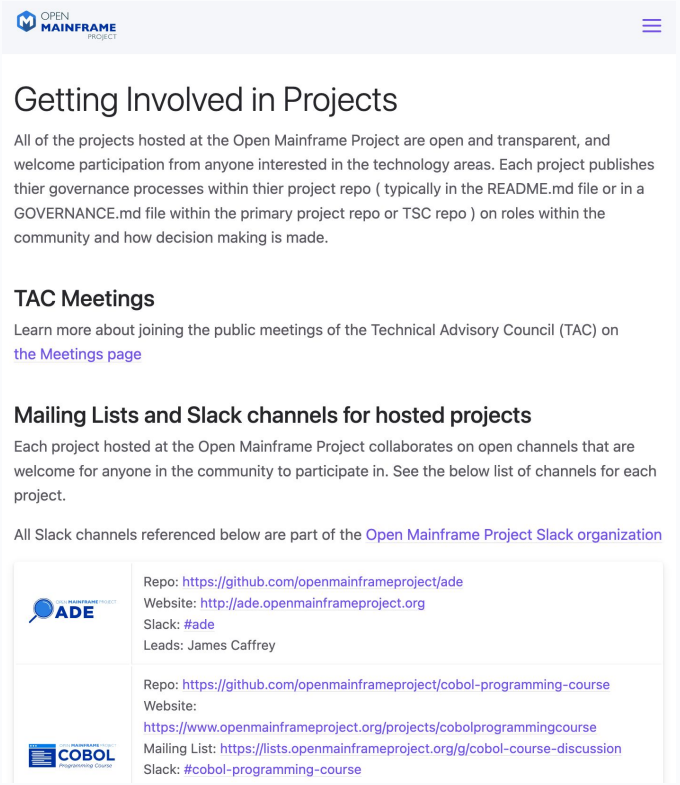

Contribute to an existing project:

- Submit a PR with a bugfix or new feature
- Pick existing GitHub issue as a sample project
- Integrate with a new app / contribute plugin
- Help improve project documentation
- Submit additional test cases
- Join the TSC discussion: dev mailing list, conf calls

Get involved with the TAC or Working Group:

- DevOps / CI expertise always useful
- Interest / expertise in security especially welcome
- Join the TAC discussions: mailing list, conf calls, working groups

More information at
tac.openmainframeproject.org/engagement

OPEN MAINFRAME PROJECT

Getting Involved in Projects

All of the projects hosted at the Open Mainframe Project are open and transparent, and welcome participation from anyone interested in the technology areas. Each project publishes thier governance processes within thier project repo (typically in the README.md file or in a GOVERNANCE.md file within the primary project repo or TSC repo) on roles within the community and how decision making is made.

TAC Meetings

Learn more about joining the public meetings of the Technical Advisory Council (TAC) on the Meetings page

Mailing Lists and Slack channels for hosted projects

Each project hosted at the Open Mainframe Project collaborates on open channels that are welcome for anyone in the community to participate in. See the below list of channels for each project.

All Slack channels referenced below are part of the Open Mainframe Project Slack organization

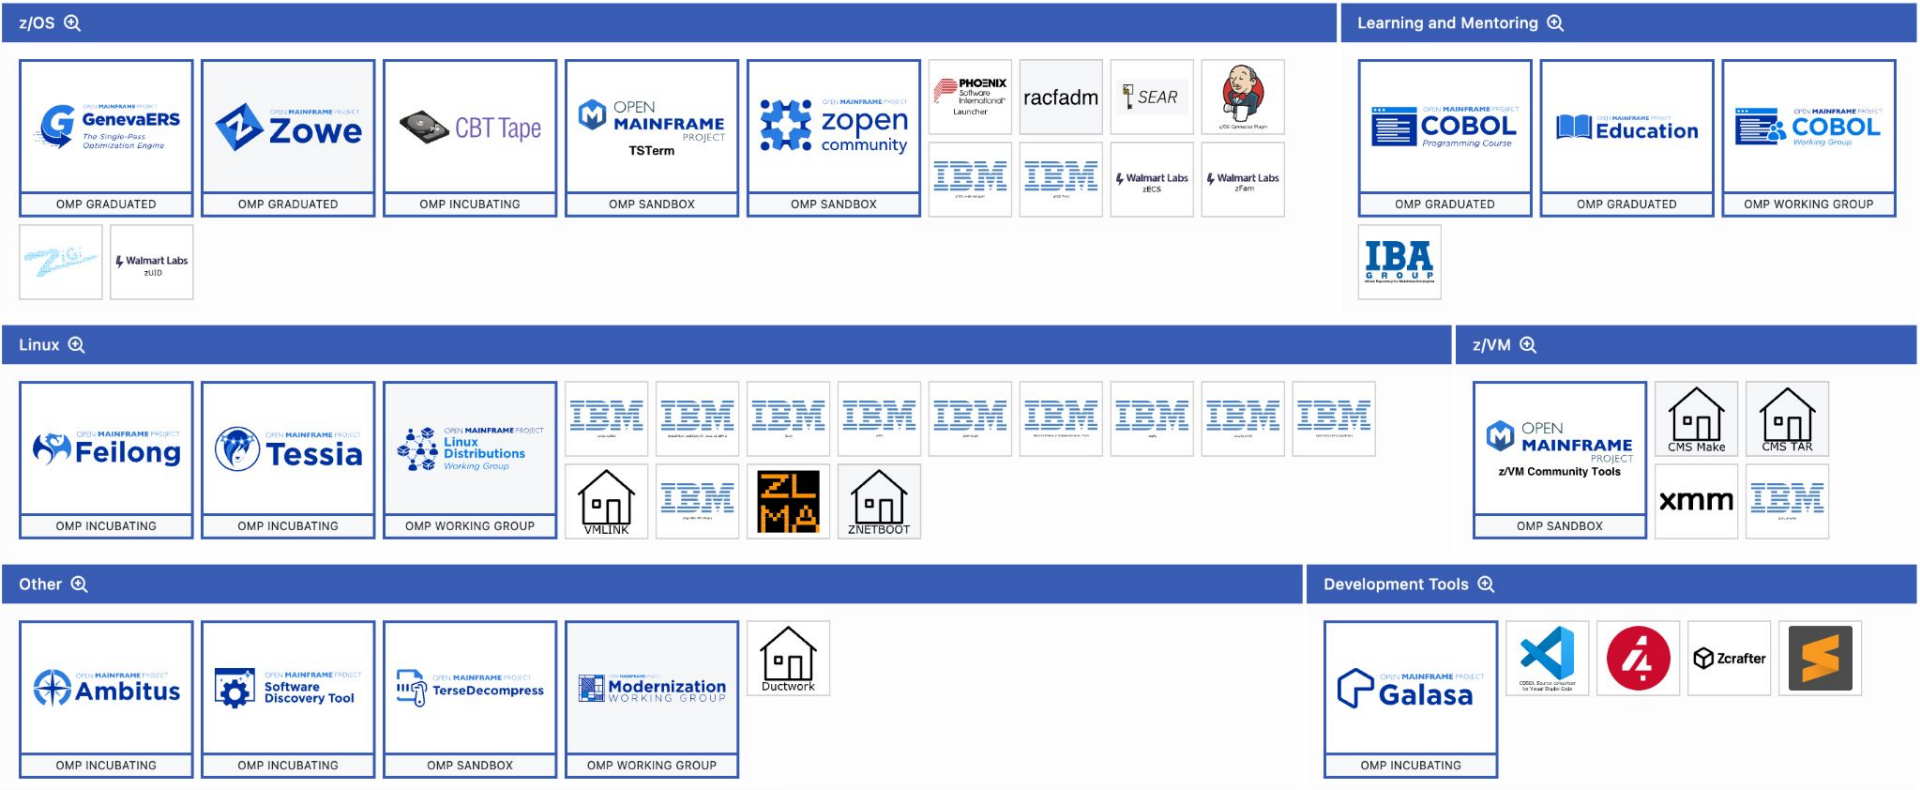

ADE

Repo: https://github.com/openmainframeproject/ade

Leveraging your membership benefits

Announcing your membership

We will include your company in an upcoming momentum press announcement. These are typically done quarterly and timed around events for maximum impact.

ACTION: Please provide 1-2 sentences on your company, name of a spokesperson, and a quote to include in the press announcement. Submit request to members.openmainframeproject.org.

Please note that these announcements are often picked up by press and media, and there may be requests for briefings.

Open Mainframe Project Kicks Off First Quarter with New Members, Additional COBOL and Linux on Z Resources and Launch of the 2nd Annual Open Mainframe Summit

Blog Post

Participate in Outreach Activities

We focus on ensuring our members can advance their thought leadership on open source on the mainframe through our extensive media reach.

ACTION: Key opportunities to leverage now:

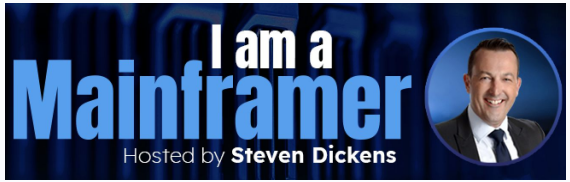

- ➔ Submit a guest blog post to the Open Mainframe Project blog and/or Linux.com. Member contributed content must be vendor neutral & talk about an interesting trend or problem in the space.
- ➔ Provide a guest for the "I Am A Mainframer" podcast series
- ➔ Share potential spokespersons who would be interested in participating in other contributed articles, videos, podcasts, and events.
- ➔ Share your news pertaining to one of our projects or your work in the open source on mainframe community for us to amplify and/or offer a quote.
- ➔ Share events you will be at so we can promote your presence and talks relating to Open Mainframe Project.

Meet the Open Mainframe Project Ambassadors

Open Mainframe Project Ambassadors are individuals who are passionate about the mainframe technology, recognized for their expertise, and willing to help others learn about it and community. Successful ambassadors are people such as bloggers, influencers, evangelists who are already engaged with an Open Mainframe project in some way including contributing to forums, online groups, community events, etc.

ACTION: If you would like an ambassador to speak at your event, please contact pr@openmainframeproject.org with the name of the conference, date and links.

- Not a job board - links to each member's job listings

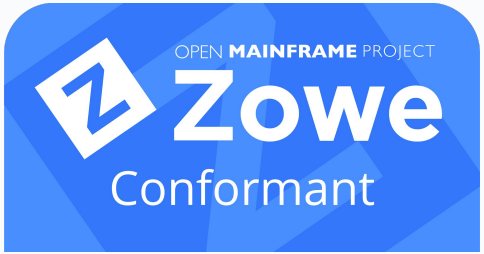

ACTION: Provide a link to your job listings specific to mainframe positions

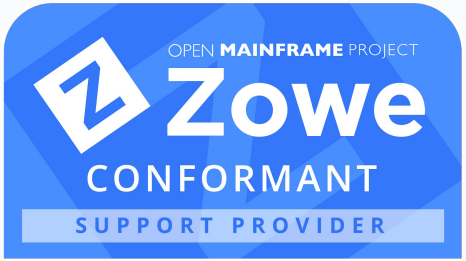

Join the Zowe Conformance Program

Zowe Conformance Program enables vendors to showcase their offerings based on Zowe, as well as their capabilities in supporting Zowe end-users.

Zowe Support Provider Conformance Program gives vendors the ability to showcase their Zowe support competencies.

Benefits

- Your offering and logo listed in the Zowe Conformant offering directory or Zowe Conformant Support Provider directory and showcased in Zowe outreach materials
- Exclusive branding marks to use in your product materials
- Participation in the Zowe Advisory Council (ZAC)
- PR announcement for new organizations providing offerings
- Post a guest blog post on your offering on the Open Mainframe Project and Zowe blog

Fees are waived for Open Mainframe Project members

More details at https://www.openmainframeproject.org/projects/zowe/conformance

70+ unique Zowe Conformant offerings

Host a Mentorship

Open Mainframe Project funds mentorships for students to bring new talent into mainframe through contributions to open source. These mentees have made huge impacts on hosted projects such as Zowe, Feilong, COBOL Programming Course, and more, as well as broad open source projects such as Alpine Linux, CloudFoundry, Kubernetes, and more. More than 1600+ students globally applied for a mentorship in 2024.

Members can provide a mentorship and be a mentor, which is funded by the Open Mainframe Project. This provides a unique opportunity to find new talent.

Contact mentorship@openmainframeproject.org if you are interested.
